LAFAZYM® THIOLS [+] 250g

Brand: Laffort

Shipping time: 24h - available

Price

236,17 PLN

Description

LAFAZYM® THIOLS [+]

A preparation of pectolytic enzymes with secondary activity designed to reveal aromatic precursors of thiol-rich grape varieties.

LAFAZYM® THIOLS[+] in synergy with yeasts specific for the disclosure of thiols will enhance the aromatic profile of wines.

It acts complementary to cold stabilization for aromatic enhancement.

It can be used for a wide range of white wines: Sauvignon, Colombard, Mansengs, Muscadet, Melon, Gewurztraminer, Scheurebe.... as well as red varieties, in particular for the production of Grenache rosé, Syrah, Merlot, Cabernet, Mourvèdre, Cinsault....

LAFAZYM® THIOLS[+] used alone will not compensate for the effect of a yeast strain that produces high amounts of thiols. To optimise the effect of the aroma, we recommend using ZYMAFLORE® X5, ZYMAFLORE® DELTA or ZYMAFLORE® VL3.

It works in synergy with yeast medium and aroma protection tools to optimise the thiol potential of the wine.
