Description

FUMARIC^{TRL}

KWAS FUMAROWY

Fumaric acid to protect wines against lactic acid bacteria.

Pure fumaric acid for controlling the growth and activity of the lactic acid bacteria responsible for malolactic fermentation in wine.

Addition of FUMARICtrl to wine:

- Avoids the onset of MLF.
- Can stop MLF while in progress.
- Preserves malic acid in wines.
- Tool for making wines with reduced SO₂ or with no sulphite added.

DOSE

Recommended dose: 30 do 60 g/hL
