Price

4 804,38 PLN

Description

OENOBRETT®

Chitosan and enzyme-based preparation for the control of Brettanomyces.

- Damage to the membrane and cell space by chitosan.
- The synergistic action of the enzymes accelerates the settling of lysed cells. The reduction of the Brettanomyces population is significant and thus prevents spoilage.
- The antimicrobial action of OENOBRETT® is an essential tool as part of an SO₂ reduction strategy.
- For use after fermentation (FA and FJM).

Dosage: 10 g/hL.
