574,85 PLN

Description

STABIVIN®

Selected and purified arabic gum solution, 100% VEREK, with a high stabilisation index.

STABIVIN® is a hydrophilic colloid which counters hazes and colloidal deposits, allowing the wine to retain maximum clarity:

- Stabilises unstable colouring matter.
- Increases protection against metallic or protein casses.
- Synergistic action with **POLYTARTRYL®**, for improved stabilisation against tartaric precipitations.
