## Description

### STABIMAX®

**STABIMAX® is a solution of superior quality gum arabic, specifically developed by the BIOLAFFORT® R&D department.**

STABIMAX® results from an innovative purification process that preserves its natural properties and improves its filterability. As it is 100% Verec, STABIMAX® has a high stabilisation power with respect to unstable colouring matter in wine. In addition, its good filterability means that it can easily be added before microfiltration.

**Dosage:** 70 to 150 mL/hL.
